Windows、Mac、Linux下安装git

注意事项

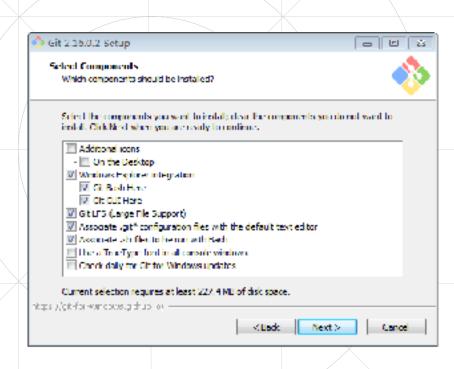

- 在安装过程中,Git会对电脑设置进行修改,360等安全管家会阻止,一定允许Git进行 修改,否则安装可能会出现错误
- 一定按照本安装教程进行安装
- 如果出现问题,可以随时在群中提问,群号: 623330491; 或者是发送邮件到邮箱: leweistudio@163.com

- 1. 打开浏览器进入Git官网,网址: https://git-scm.com/,下载安装程序
- 2. 找到已经下载好的程序,并打开进入安装过程

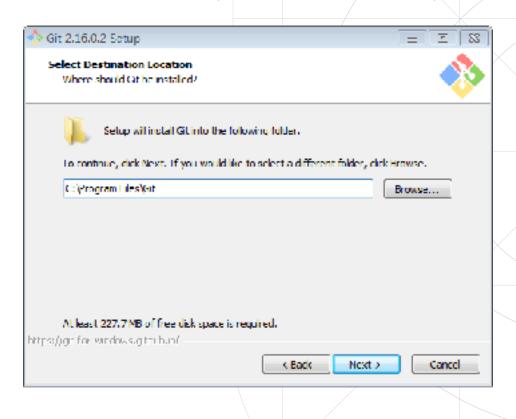

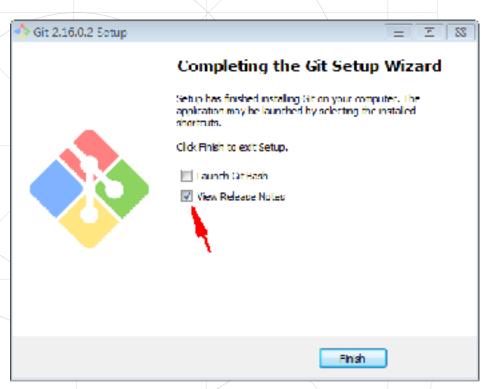

- 3. 同意用户协议,点击确认
- 4. 选择要安装的组件,默认即可

- 5. 选择安装路径,推荐使用默认安装路径
- 6. 进行相关的配置,采用默认设置即可,点击Next,直至进入安装状态,取消勾选完成安装

7. 点击Git Bash Here, 进入Git命令行, 如图:

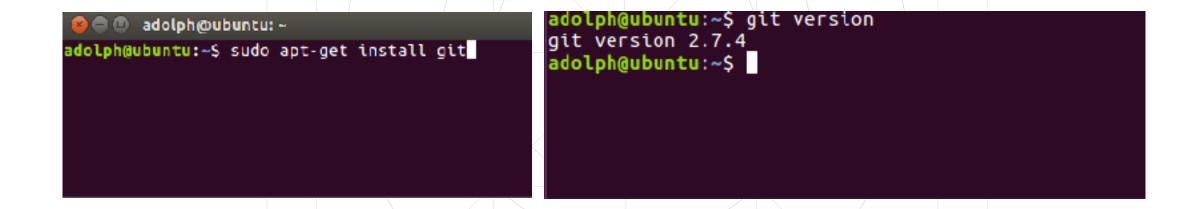

```
MINGW64:/c/Users/adolph/Desktop
                                                    o 3 X
adolph@WIN F05DDKDI8Q1 MINGW64 ~/Desktop
```

8. 输入"git version"命令,敲击,如果出现如下界面,则说明安装成功

```
MINGW6/c/Users/adolph/Decklop
                                                                          ndoTph@WTN-F05DDKDT8Q1 MINGW64 "/Desktop (master)
 git version
git version 2, 16, 0, windows, 2
adolph@WIN_F05DDKD18Q1_MINGW64_^/Desktop_(master).
```

Linux下安装Git

- 1. 在终端里,输入sudo apt-get install git 即可完成安装
- 2. 输入git version 验证是否安装成功

Mac下安装Git

1. 安装git之前需要安装Homebrew包管理器,进入命令行终端,输入如下命令并敲击回车 ruby -e "\$(curl --insecure -fsSL https://raw.githubusercontent.com/Homebrew/install/master/install)"

```
admindeMacBcok-Pro:- admir$ ruby -e "$(curl --insecure -fsSL https://raw.githubulsercontent.com/Homebrew/irstall/master/install)"

==> This script will install:
/ush/local/bin/brew
/ush/local/share/dcc/homebrew
/ush/local/share/man/man1/brew.1
/ush/local/share/zsh/site-functions/_brew
/ush/local/etc/bash_completion.d/brew
/ush/local/etc/bash_completion.d/brew
/ush/local/Homebrew

Press RETURN to cortinue or any other key to abort
```

2. 敲击回车进入安装过程

Mac下安装Git

- 1. 在命令行终端下,输入"brew install git",敲击回车即可进入git安装过程
- 2. 完成安装后,输入"git version",敲击回车,验证是否安装成功

admindeMacBook-Pro:~ admin\$ git version git version

谢谢观看
